RES-001

Evidence-based practice: three components?

RES-002

The five steps of the EBP process?

RES-003

PICO question?

RES-004

Evidence hierarchy for treatment effectiveness (strongest first)?

RES-005

A client declines the treatment with the strongest research support. EBP response?

RES-006

What makes a design a true experiment?

RES-007

Quasi-experimental design?

RES-008

Pre-experimental designs?

RES-002

Ask an answerable question, acquire the evidence, appraise it, apply it with the client's preferences and your expertise, and evaluate the outcome.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-001

Best available research evidence, clinical expertise, and the client's values, preferences and circumstances. EBP is not 'manualized treatment only.'

Sackett, D. L., et al. (1996). Evidence based medicine: What it is and wh...

RES-004

Systematic reviews and meta-analyses of RCTs, then RCTs, then quasi-experiments, then observational studies, then case reports and expert opinion.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-003

Population, Intervention, Comparison, Outcome: a format for an answerable practice question.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-006

Random assignment to groups, plus a control or comparison group.

Campbell, D. T., & Stanley, J. C. (1963). Experimental and Quasi-Experim...

RES-005

Client values are one of the three components: discuss options and choose an effective approach that fits the client.

Sackett, D. L., et al. (1996). Evidence based medicine: What it is and wh...

RES-008

One-group pretest-posttest or one-shot case study: weakest causal evidence.

Campbell, D. T., & Stanley, J. C. (1963). Experimental and Quasi-Experim...

RES-007

Compares groups or time points without random assignment, such as a nonequivalent comparison group or time series.

Campbell, D. T., & Stanley, J. C. (1963). Experimental and Quasi-Experim...

RES-009

Independent versus dependent variable?

RES-010

Cross-sectional versus longitudinal design?

RES-011

Qualitative research: common approaches and sampling?

RES-012

Rigor in qualitative research (Lincoln and Guba)?

RES-013

Mixed methods?

RES-014

Single-system design: A and B phases?

RES-015

Baseline: how many data points?

RES-016

AB design: strength and limit?

RES-010

Cross-sectional: data at one point in time. Longitudinal: the same participants measured repeatedly over time.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-009

Independent: what is manipulated (the intervention). Dependent: the outcome measured.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-012

Credibility (member checking, triangulation), transferability, dependability and confirmability.

Lincoln, Y. S., & Guba, E. G. (1985). Naturalistic Inquiry. SAGE trustworthi...

RES-011

Ethnography, grounded theory, phenomenology, narrative and case study; purposive sampling; thematic analysis.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-014

A is the baseline (repeated measurement before intervention); B is the intervention phase.

Bloom, Fischer & Orme (2009). Evaluating Practice (6th ed.) single-syste...

RES-013

Combines qualitative and quantitative data in one study to answer complementary questions.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-016

Simple and practical for monitoring change, but cannot establish that the intervention caused it (history, maturation).

Bloom, Fischer & Orme (2009). Evaluating Practice (6th ed.) AB design

RES-015

Enough to show a stable pattern, usually at least 3, and more if the data are variable.

Bloom, Fischer & Orme (2009). Evaluating Practice (6th ed.) baselining

RES-017

ABAB (reversal) design?

RES-018

Multiple-baseline design?

RES-019

Client in crisis, no time for a baseline?

RES-020

Changing-criterion design?

RES-021

Visual analysis of single-system data?

RES-022

Goal attainment scaling?

RES-023

Reliability versus validity?

RES-024

Test-retest reliability?

RES-018

Staggers the intervention across behaviors, settings or clients; shows causal effect without withdrawing treatment.

Bloom, Fischer & Orme (2009). Evaluating Practice (6th ed.) multiple-bas...

RES-017

Withdraws and then reinstates the intervention: stronger causal evidence, ends on treatment, but withdrawing a working treatment raises ethical concerns.

Bloom, Fischer & Orme (2009). Evaluating Practice (6th ed.) experimenta...

RES-020

The target is raised step by step; change that tracks each new criterion supports an effect.

Bloom, Fischer & Orme (2009). Evaluating Practice (6th ed.) changing-cri...

RES-019

Start treatment (B or BAB design) or use a retrospective baseline from records or recall.

Bloom, Fischer & Orme (2009). Evaluating Practice (6th ed.) B and BAB d...

RES-022

Client-specific outcomes rated on a 5-point scale from -2 (much worse than expected) to +2 (much better).

Kiresuk, T. J., & Sherman, R. E. (1968). Goal attainment scaling. Commun...

RES-021

Look at level, trend (slope), variability and overlap between phases.

Bloom, Fischer & Orme (2009). Evaluating Practice (6th ed.) analysis of s...

RES-024

Stability of scores over time when the trait hasn't changed.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-023

Reliability is consistency; validity is measuring what you intend. A measure can be reliable but not valid; an unreliable measure can't be valid.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-025

Internal consistency?

RES-026

Interrater reliability?

RES-027

Face versus content validity?

RES-028

Concurrent versus predictive validity?

RES-029

Convergent versus discriminant validity?

RES-030

Internal versus external validity of a study?

RES-031

Threats to internal validity?

RES-032

Regression to the mean?

RES-026

Agreement between observers rating the same thing (for example, Cohen's kappa). Improve it with clear definitions and rater training.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-025

How well items on a scale hang together, often reported as Cronbach's alpha.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-028

Both are criterion validity. Concurrent: matches a criterion measured at the same time. Predictive: forecasts a later criterion.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-027

Face: looks right on the surface (weak evidence). Content: covers the full range of the construct, judged by experts.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-030

Internal: did the intervention cause the change? External: do the results generalize to other people and settings?

Campbell, D. T., & Stanley, J. C. (1963). Experimental and Quasi-Experim...

RES-029

Construct validity: correlates with measures of the same construct (convergent) and not with unrelated ones (discriminant).

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-032

Extreme scores tend to move toward the average on retest, which can look like improvement without any effect.

Campbell, D. T., & Stanley, J. C. (1963). Experimental and Quasi-Experim...

RES-031

History, maturation, testing, instrumentation, regression to the mean, selection and attrition (mortality).

Campbell, D. T., & Stanley, J. C. (1963). Experimental and Quasi-Experim...

RES-033

Probability versus nonprobability sampling?

RES-034

Snowball sampling: when useful?

RES-035

Type I versus Type II error?

RES-036

p < .05?

RES-037

Statistical versus clinical significance?

RES-038

Effect size?

RES-039

Needs assessment: when and what?

RES-040

Formative (process) evaluation?

RES-034

Hard-to-reach populations: participants refer others they know.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-033

Probability: every member has a known chance (simple random, stratified, cluster). Nonprobability: convenience, purposive, snowball, quota.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-036

The conventional threshold for statistical significance: results this extreme would be unlikely if there were no real effect.

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-035

Type I: a false positive (finding an effect that isn't real). Type II: a false negative (missing a real effect).

Rubin, A., & Babbie, E. R. (2017). Research Methods for Social Work (9th...

RES-038

A measure of how large a difference or relationship is, independent of sample size (for example, Cohen's d).

Cohen, J. (1988). Statistical Power Analysis for the Behavioral Sciences (2...

RES-037

A result can be statistically significant but too small to matter in practice; effect size shows magnitude.

Cohen, J. (1988). Statistical Power Analysis for the Behavioral Sciences (2...
